## Education

### Northeastern University

Sep. 2022 – May 2026

*B.S. in Computer Science*

*Boston, MA*

Concentration: Artificial Intelligence

GPA: 3.84/4.00 | Dean's List

Activities: NEU SGA, Northeastern Electric Racing Club, NEU Club Golf

## Technical Skills

**Languages:** Python, Java, Kotlin, SQL, C, HTML/CSS, TypeScript

**Developer Tools:** VS Code, IntelliJ, SQL Workbench, Git, Github, AWS(RDS, EC2), Docker, Kali Linux

**Technologies/Frameworks:** ReactJS, Flask, NumPy, Pandas, Matplotlib, Junit, JSwing

## Relevant Coursework

- Object Oriented Design
- Algorithms and Data
- Computer Systems
- Foundations of Data Science
- Foundations of Cybersecurity
- Mathematics of Data Models

## Work Experience

### Northeastern University Student Government Association

January 2024 – Present

*Software Developer*

*Boston, MA*

- Collaborated with team members to develop a full-stack web application to allow NEU SGA members to clearly run for office and gather votes among Northeastern students
- Effectively made use of online resources to independently gain proficiency in TypeScript and ReactJS
- Made use of Agile ideology and sprints to efficiently plan and execute goals in a timely manner
- Utilized many common practices relating to Git and GitHub to allow for seamless code version control

### Khoury College of Computer Sciences

September 2023 - December 2023

*Teaching Assistant for Discrete Mathematics*

*Boston, MA*

- Provided course help in Discrete Mathematics for 150 freshman students and held interactive office-hours to teach content
- Provided professors with much assistance by evaluating and grading student homework and exams
- Offered flexible hours of availability so that the students could feel sufficiently supported

## Projects

### Health Disease Detector | *Python, TypeScript, React, Flask* |

May 2024 - Present

- Achieved 95 % precision and accuracy with trained Machine-Learning models to predict the likelihood someone possesses heart disease or diabetes based on personal health info
- Created smooth-loading and seamless web pages by designing an efficient RESTful application, using React web pages to connect to Flask endpoints
- Displayed important resources to allow users to understand the results of given health disease predictions

### NEUDorms.com | *Python, SQL, HTML, CSS* |

December 2023 - January 2024

- Designed relational SQL databases and created an AWS RDS instance to allow for smooth web deployment and improve platform scalability
- Launched a full-stack web application by using Flask forms, SQL databases, and CSS styling to gather, average, and display user reviews of student dorms
- Provided resources to enable 15,000 students at Northeastern University to learn about the on-campus living effectively

### Reversi | *Java*

November 2023 - December 2023

- Utilized abstraction to allow command-line functionality for both hexagonal and square versions of the Othello game Reversi using Swing.
- Designed code using the MVC model along with factory, observer, adapter, and strategy patterns to allow for quick communication between different objects and real-time GUI updates for user actions
- Adapted code to work with clients' code and wrote thorough JUnit tests, ensuring 100% line coverage

## Interests & Skills

Golf Nerd, Indoor Rock Climbing, Piano, Cooking, Traveling, Robotics
