Jacob Wu-Chen

Boston, MA | Washington, DC | Seattle, WA | **Active Secret Clearance**

301-385-4159 wu-chen.j@northeastern.edu jakewc.com linkedin.com/in/jacob-wu-chen github.com/jakewc12

Education

Northeastern University **Sep 2022 – May 2026**

B.S. in Computer Science, Concentration in Artificial Intelligence *Boston, MA*

- GPA: 3.8/4.0 | Dean's List
- Activities: Student Government Association, Electric Racing Club, Club Golf

Technical Skills

Languages: Python, TypeScript, Java, Kotlin, SQL, C, HTML/CSS
Frameworks & Libraries: React, Next.js, FastAPI, Flask, PyTorch, NumPy, Playwright, Vitest, PyTest
Tools & Platforms: Git/GitHub, Opencode, AWS (EC2, Lambda), Docker, VS Code, IntelliJ, Conda

Work Experience

MORSE Corp **Jun 2026 – Present**

Full-Stack Software Engineer (Forward Deployed) *Cambridge, MA*

- Embedded on-site with end users as a **forward deployed engineer**, serving as the primary technical liaison between customers and the core engineering team
- Translated direct user feedback and mission requirements into prioritized feature requests and bug reports, shortening the loop between field needs and delivered solutions
- Built and maintained full-stack applications and services addressing operational challenges across the U.S. national security ecosystem

Proviras **March 2026 – Present**

Co-founder and CTO *Boston, MA*

- Founded Proviras, a platform that helps AI agent teams cut LLM costs without sacrificing quality by shadow-testing cheaper models against production traffic and surfacing measured downgrade recommendations
- Built a TypeScript SDK (published on npm) that hooks into LangGraph agent flows to capture LLM calls and stream them to a dashboard for analysis; shadow-testing engine launching September 2026
- Reached over 1000 npm and PyPl downloads in less than a month

MORSE Corp **Jul 2025 – Dec 2025**

Full-Stack Engineer Co-op *Cambridge, MA*

- Developed and extended FastAPI endpoints, supporting new full-stack features and improved API usability
- Added **over 5** new frontend features and pushed frontend fixes for **over 10** feature bugs
- Created a shell script to **automate docker production deployment**, removing user dependency during deployment

Air Force Research Laboratory **Aug 2024 – Dec 2024**

Machine Learning & Computer Vision Co-op *Rome, NY*

- Developed a detection model to separate in-distribution and out-of-distribution data with an **86 %** accuracy rate utilizing Convolutional Neural Nets and Vision Transformers
- Researched state-of-the-art image classification models to facilitate the development of personal-use ML models

Projects

Senate Attendance Manager **Jun 2025 – May 2026**

TypeScript, Next.js, Supabase, Vercel

- Maintained and updated a production environment with **50 active users**, as well as dev and staging environments
- Created a CI/CD pipeline, automating production deployments, running database migrations, integration tests
- Designed and developed a full-stack application using a NextJS tech suite, allowing for seamless and serverless communication between the frontend and backend

Interests

Golf, Indoor Rock Climbing, Piano, Cooking, Traveling, Robotics
